

## 1. SCOPE

This statement clarifies KEYMILE's product compliance with the European Union's directive 2011/65/EU, Restrictions of Hazardous Substances ("RoHS" directive) and similar regulations that may be adopted by other countries. The RoHS directive became valid on July 1<sup>st</sup> 2006 and was recast on June 8<sup>th</sup> 2011 in the member states of the European Union. It states that all new electrical and electronic equipment put on the market within the member states must not contain certain hazardous materials.

## 2. RESTRICTED (RoHS) MATERIALS

Quantity limit 0.1% of weight (1000ppm) of any homogeneous material:

1. Lead (Pb)
2. Mercury (Hg)
3. Hexavalent Chromium (Cr VI)
4. Flame retardants Polybrominated Biphenyls (PBB) and Polybrominated Diphenyl Ethers (PBDE)

Quantity limit 0.01% of weight (100 ppm) of any homogeneous material:

5. Cadmium (Cd)

'Homogeneous material' means a material that cannot be mechanically disjointed into different materials by, for example unscrewing, cutting, crushing, grinding and abrasive processes. Homogeneous is further defined as "of uniform composition throughout".

## 3. EXEMPTIONS

The following applications are exempted from the restriction (according to "RoHS" directive, Annex III):

- 7(b) Lead in solders for servers, storage and storage array systems, network infrastructure equipment for switching, signalling, transmission, and network management for telecommunications
- 7(c)-I Electrical and electronic components containing lead in a glass or ceramic other than dielectric ceramic in capacitors, e.g. piezoelectric devices, or in a glass or ceramic matrix compound

## 4. RoHS COMPLIANCE STATEMENT

KEYMILE, as a producer of telecommunication equipment, is committed to complying with the RoHS directive. KEYMILE products do not contain any hazardous substance listed under "2. Restricted Materials" under consideration of the exemptions for applications listed under "3. Exemptions" as defined in the "RoHS" directive, Annex III.
